

TempaCure[®]

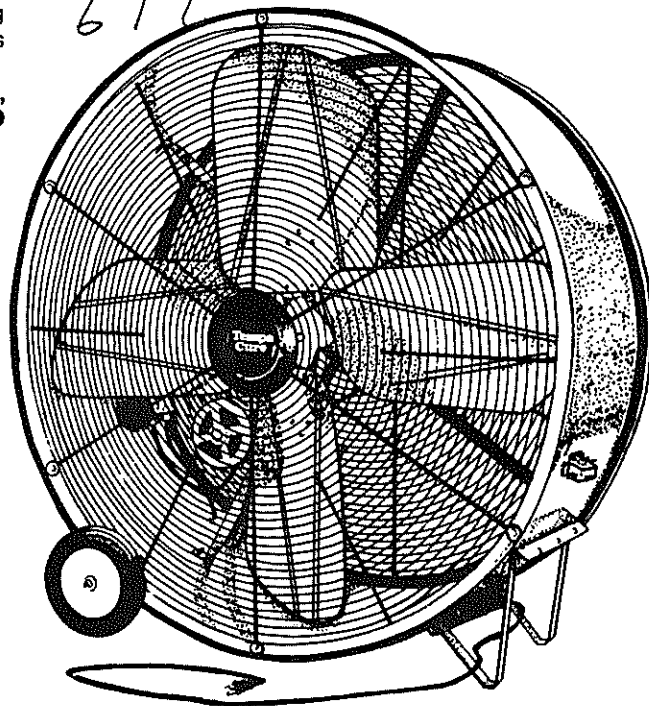

Portable Cooler

OPERATING GUIDE

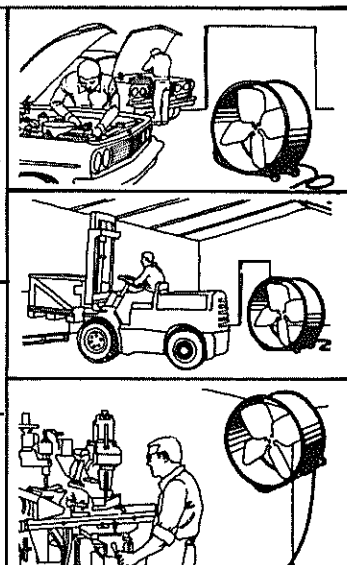

IMPORTANT: Read and save this operational guide before using this fan. Failure to follow the safety rules and other safety precautions may result in personal injury.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT USE THIS FAN WITH ANY SOLID-STATE FAN SPEED CONTROL DEVICE.

1. Your TPC fan will operate only on 120 volt AC 60 Hz current.
2. Do not expose fan to rain. Guard against electric shock while fan is connected to a power source by touching fan and grounded objects such as pipes, radiators, ranges, etc.
3. Don't abuse cord. Never yank cord to disconnect from receptacle. Keep cord from heat, oil and sharp edges. Inspect cord periodically and replace if damaged.
4. Disconnect fan when not in use, before servicing or when replacing parts such as blade or motor.
5. Don't carry or move fan when plugged in. Be sure switch is in "Off" position prior to plugging fan into power supply.
6. When fan is used outdoors with extension cord, use only extension cord intended for outdoor use and so marked. The TPC fan is equipped with a 3-prong grounding type. Only round jacketed extension cords should be used and we recommend they be listed by Underwriters Laboratories (U.L.).
7. Check for damaged parts. If fan becomes damaged, check carefully to determine that fan will operate properly and perform as intended. Any damaged part should be repaired or replaced. To avoid risk of fire, electric shock or injury, disconnect from power source before servicing.
8. Do not operate fan near flammable liquids or in gaseous or explosive atmospheres. Motors spark and sparks might ignite fumes.
9. If screen guard is removed, replace before normal operation.
10. Turn off electrical supply to fan when a power failure exists. This will prevent motor burnouts or unexpected restarting which may be hazardous.

A TPC Portable Cooler will make cooling a breeze anywhere that air conditioning is impractical or uneconomical.
